Hello Laura:

Erin Formanek is trying to track down your requested information with EPA.

Gunnar

Subject: EPA comments CFAC BHHRA Interim Deliverable

Hi Gunnar,

EPA's comment #5 on the BHHRA interim deliverable references an ATV activity based sampling study from Colorado for fugitive dust generation. Would EPA/CDM be able to provide that study/data so we can review to see if it's applicable to our Site?

Please see the comment below:

5) Exposure Assessment Exposure Point Concentrations – Fugitive Dust Generation (Page 4) – Rather than rely upon an all-terrain (ATV) particulate emission factor (PEF) study from Michigan, it is recommended that an ATV activity-based sampling (ABS) study from Colorado be used as it would be more representative of Site conditions. The ATV ABS data collected at the Nelson Tunnel Superfund Site data that can be used to generate a PEF, these data can be provided by EPA.

Thank you,
Laura
